

## **AMENDMENTS TO THE SPECIFICATION**

**Page 5, immediately below line 5, insert the following paragraph:**

- Figure 6 is a partial longitudinal cross-section view along axis X-X' of figure 1.

**Page 7, replace the paragraph at lines 21-27 with the following paragraph:**

Accordingly, a further object of the invention is a syringe 40 for injection of pharmaceutical products, particularly into human tissues, made up of a pump body 42 which also acts as a reservoir for the pharmaceutical product to be injected, equipped with an end-fitting 43 onto which an injection needle 14 is fitted, and a piston 44 for propelling the pharmaceutical product through the needle 14, as this syringe comprises an injection needle 14 of the invention.

In the drawings:

Please insert the new drawing sheet for Figure 6 attached hereto.
